Introduction:

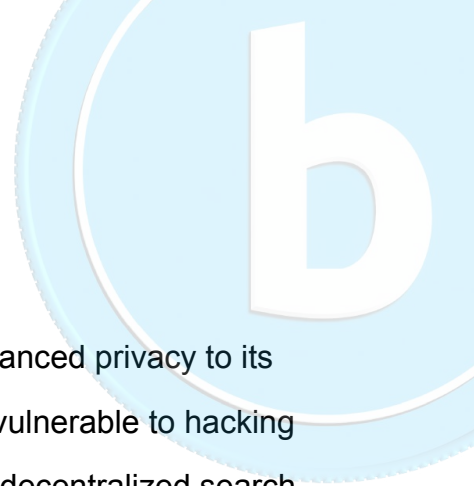

With the ever-increasing popularity of cryptocurrencies and the blockchain technology behind it, there is a growing need for a crypto search engine that caters specifically to the crypto world. A crypto search engine for the crypto platform would provide several benefits, such as enhanced privacy, increased security, and the ability to search for information across multiple blockchain networks.

In this white paper, we will discuss the concept of a crypto search engine powered by a blockchain or the crypto platform, its benefits, and how it can be implemented using existing blockchain technologies.

Background:

Currently, most search engines, including Google and Bing, rely on centralized servers to store and index web pages. This centralized architecture is susceptible to hacking and data breaches, compromising users' privacy and security. Additionally, these search engines often have biases and may not show relevant results for certain search queries.

A crypto search engine, on the other hand, would use a distributed network of nodes to store and index web pages. This architecture would eliminate the need for a central server, making the search engine more secure and private. Additionally, a decentralized search engine would be more transparent and less prone to biases, as there is no central authority controlling the search results.

Enhanced Privacy:

A decentralized search engine for the crypto platform would provide enhanced privacy to its users. As mentioned earlier, the current centralized search engines are vulnerable to hacking and data breaches, which can compromise users' private information. A decentralized search engine would eliminate this vulnerability by using a distributed network of nodes to store and index web pages. This way, the user's search queries and personal information are not stored in a central location, making it less susceptible to hacking.

Increased Security:

Decentralized search engines for the crypto platform would also provide increased security to its users. As cryptocurrencies are decentralized in nature, it is crucial to have a search engine that is similarly distributed. This architecture would make the search engine less vulnerable to hacking and attacks as there is no central server to be compromised. Additionally, a decentralized search engine would allow users to search across multiple blockchain networks securely.

Better Search Results:

Current search engines may not provide relevant results for certain crypto-related queries due to their centralization and inherent biases. A decentralized search engine for the crypto platform would be more transparent and less prone to biases, providing better search results for its users. Additionally, a decentralized search engine would allow users to search across multiple blockchain networks, providing a comprehensive view of the information available.

Implementation:

To implement a decentralized search engine for the crypto platform, we can use existing blockchain technologies such as Ethereum, IPFS, and Swarm. Ethereum provides a robust smart contract platform that can be used to create a decentralized search engine. IPFS and Swarm are decentralized file storage systems that can be used to store and index web pages. The search engine's architecture would consist of a smart contract on the Ethereum network, which would contain the search algorithm and the index of the web pages. The web pages would be stored and indexed on IPFS or Swarm. Users would interact with the search engine using a decentralized application (dApp) that would communicate with the smart contract on the Ethereum network.

Conclusion:

A decentralized search engine for the crypto platform would provide several benefits, such as enhanced privacy, increased security, and better search results. Using existing blockchain technologies such as Ethereum, IPFS, and Swarm, we can create a decentralized search engine that caters specifically to the crypto world. This search engine would provide a comprehensive view of the information available across multiple blockchain networks, making it an invaluable tool for crypto enthusiasts and investors.

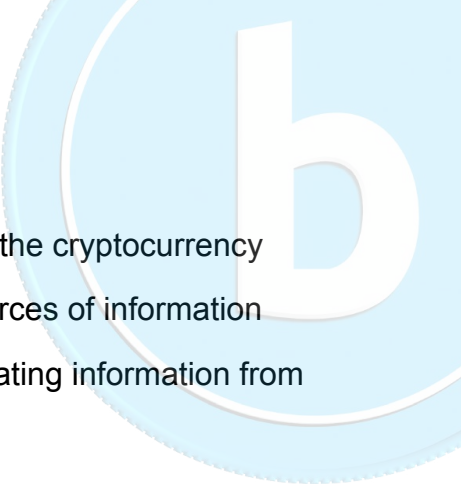

Challenges and Potential Solutions:

While a decentralized search engine for the crypto platform has several benefits, there are also challenges that must be addressed. One significant challenge is the lack of incentives for nodes to participate in the search engine network. In a decentralized system, nodes need to be incentivized to participate and provide resources to the network.

One potential solution to this challenge is to use a token incentive mechanism to reward nodes for their contributions to the network. This token can be used to pay for the storage and indexing of web pages or to reward nodes for providing relevant search results.

Another challenge is the scalability of the search engine network. As more nodes join the network, the search engine's performance may be affected. One potential solution to this challenge is to use sharding, which would divide the search engine network into smaller, more manageable sub-networks. Each sub-network would be responsible for indexing and searching a specific subset of web pages, improving the search engine's performance.

Additionally, the search engine's accuracy may be affected by malicious nodes trying to manipulate the search results. One potential solution to this challenge is to use reputation-based systems to identify and exclude malicious nodes from the network. Nodes with a good reputation score would be more likely to participate in the network and receive rewards.

Bitfinder is a powerful and user-friendly search engine designed for the cryptocurrency industry. Its main purpose is to provide relevant and trustworthy sources of information related to the crypto market, saving users time and effort by aggregating information from various sources across the web.

One of the key features of **Bitfinder** is its advanced filtering options. Users can filter results based on specific criteria such as coins, tokens, or blockchain platforms, making it easier to find information that is relevant to their specific needs and interests.

The search engine also provides real-time information on market prices, trading volumes, and other important metrics related to the cryptocurrency market. This real-time data allows users to make more informed decisions when investing or trading in digital assets.

In addition to these features, Bitfinder offers a comprehensive and user-friendly interface, making it easy to navigate and use. The search engine is designed to be intuitive, allowing users to quickly find the information they need without the hassle of sifting through irrelevant or outdated results.

Security is also a top priority for Bitfinder. The search engine utilizes the latest security protocols to protect user data and maintain privacy, ensuring that users can trust the information they receive.

Overall, Bitfinder is a valuable tool for anyone interested in the cryptocurrency market. Its advanced filtering options, real-time information, user-friendly interface, and focus on security make it an ideal choice for those looking to stay up-to-date and informed about the latest trends and developments in the crypto industry.

How it All Started

Ibrahim & John first met in 2010 and quickly bonded over their shared interest in blockchain technology and its potential to revolutionize the financial industry. Fast forward to 2022, the two recognized a gap in the market and began working on a crypto search engine that would help businesses and individuals quickly find relevant information about cryptocurrencies and blockchain technology.

However, they soon realized that the project needed more time and resources than they initially anticipated. Undeterred, Ibrahim and John decided to start their own crypto search engine in 2022 and dedicate themselves fully to the development of the search engine. They worked tirelessly to refine the tool, incorporating features that would enable users to conduct market research, perform competitive analysis, and stay up-to-date with the latest developments in the crypto industry.

Bitfinder is poised to become one of the leading crypto search engines in the years to come, serving a growing user base that includes businesses, investors, and crypto enthusiasts around the world. Despite the challenges of running a startup in a rapidly-evolving industry, Ibrahim and John remain passionate about their work and committed to helping people navigate the complex and exciting world of crypto.

Advertisers

Bitfinder Crypto Search Engine is a cutting-edge platform that offers a wide range of features and services for advertisers and earners in the cryptocurrency market. Below are some of its key features:

Advertisers:

- Advertising: Bitfinder offers various types of advertising options, including text ads, sponsor ads, and top-of-search ads to help advertisers gain maximum visibility for their campaigns.
- Crypto Directory Listing: The platform provides advertisers with an opportunity to showcase their projects on the top right panel of the Crypto Directory listing using text ads, sponsor ads, and top-of-search ads.
- Video Advertising: Bitfinder offers video advertising to help advertisers promote their crypto-related videos for increased exposure.
- Submit Crypto Offers and Surveys: Advertisers can submit their crypto offers and surveys to gain visibility and attract more participants.
- Advertise ICOs, ICO Drops, Bounties, and Exchangers: Bitfinder allows advertisers to promote their ICOs, ICO drops, bounties, and exchangers to attract more investors.
- Advertise Articles and Post Crypto News: Advertisers can promote their articles and post crypto news to keep the Bitfinder community updated on the latest happenings in the cryptocurrency market.

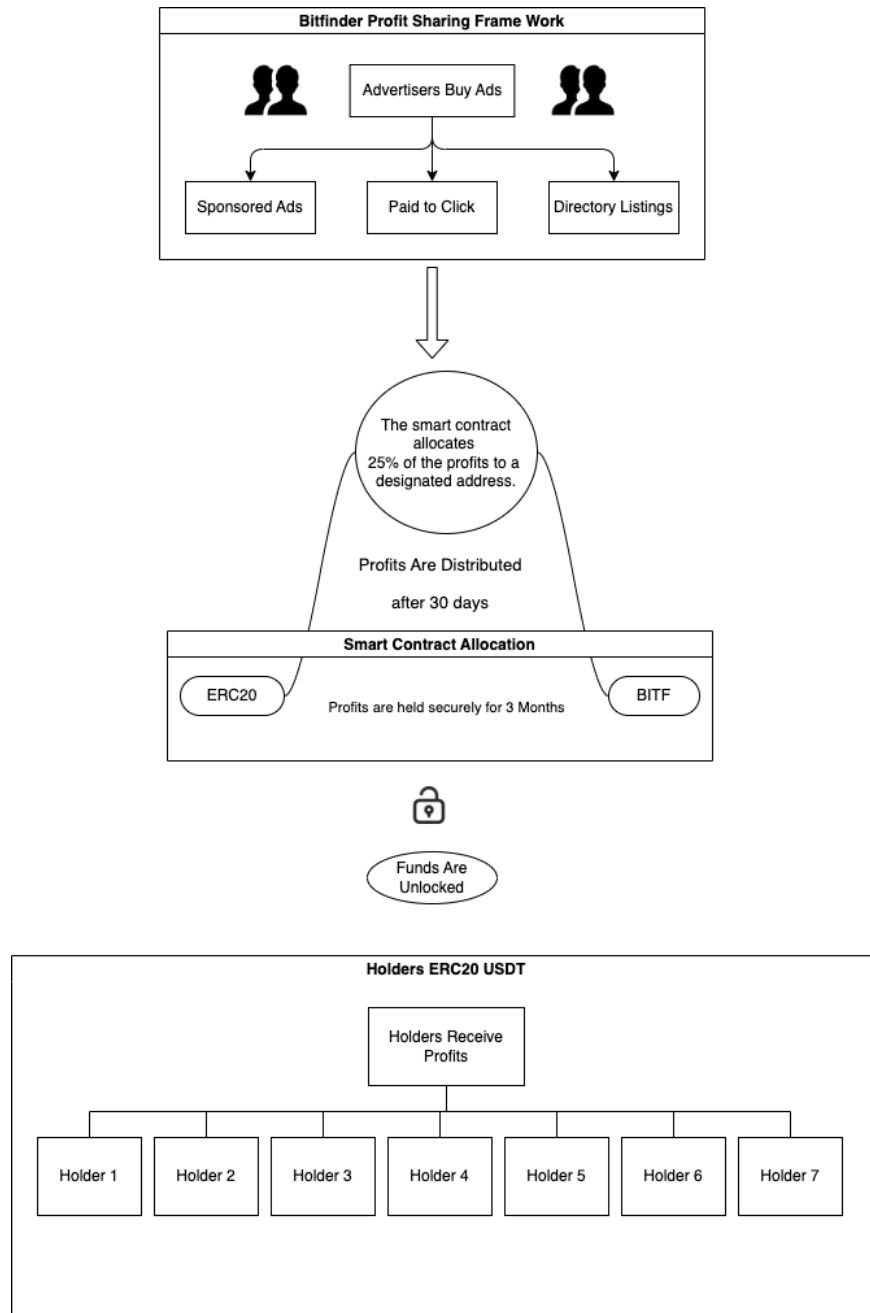

For Earners

For Earners:

- Profit-Sharing: Bitfinder offers a profit-sharing program that pays 25% of the net amount for holding tokens on the system.
-
- Play Games to Earn Crypto: Bitfinder offers multiple games that allow earners to earn cryptocurrency by playing and winning.
- Paid to Watch Crypto Videos (PTWV): Bitfinder offers a PTWV program that pays earners to watch crypto-related videos.
- Paid to Click on Ad (PTC): Bitfinder offers a PTC program that pays earners to click on ads in different sections, not just the search engine.

Bitfinder Crypto Search Engine is continually evolving to offer more features and services to its users. Its focus on delivering value to both advertisers and earners in the cryptocurrency market makes it an essential platform for anyone looking to engage in this exciting and dynamic industry.

Frame Work 25% Profits Sharing Distribution

Publishers

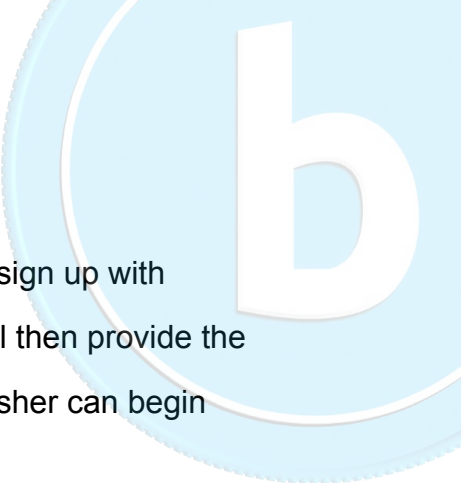

Bitfinder Crypto Search Engine is introducing an AdSense-like feature, which involves placing ads on third-party websites and paying publishers a share of the revenue generated by those ads. This model is designed to provide website owners with a simple and effective way to monetize their website traffic while also offering advertisers an opportunity to reach their target audience.

In this business model, advertisers can sign up with Bitfinder and create ad campaigns that will be displayed on third-party websites that are part of the Bitfinder ad network. These ads may take the form of banner ads, text ads, or other types of advertisements that are relevant to the content of the website.

When a user clicks on one of these ads, the advertiser pays Bitfinder a certain amount of money, and Bitfinder shares 50% of the revenue generated by the ad with the website publisher that hosted the ad. The publisher's revenue share is calculated based on the number of clicks the ad received and the revenue generated by those clicks.

The AdSense-like feature has several advantages for both advertisers and publishers. For advertisers, it provides a cost-effective way to reach a large audience, as they only pay when someone clicks on their ad. Additionally, by working with Bitfinder, advertisers can easily manage and track their campaigns across multiple websites.

For publishers, the AdSense-like feature provides an opportunity to monetize their website traffic without having to sell their own products or services. By hosting ads on their website, publishers can generate a steady stream of revenue without having to invest in expensive advertising campaigns or hire a dedicated sales team.

To participate in this feature as a publisher, website owners must first sign up with Bitfinder and agree to the network's terms and conditions. Bitfinder will then provide the necessary code and tools to display ads on the website, and the publisher can begin earning revenue as users click on those ads.

Overall, the AdSense-like feature on Bitfinder Crypto Search Engine provides a valuable opportunity for website owners to monetize their traffic, while also offering advertisers a cost-effective way to reach their target audience. With a 50% revenue share for publishers, this feature is a win-win for both parties involved.

Bitfinder's platform offers a unique way for publishers to earn revenue from their online content. The process involves matching ads to a website based on its content and visitors. Advertisers create and fund the ads in order to promote their products or services. The revenue earned by a publisher is dependent on the specific ads displayed, as advertisers pay varying prices for different ads. This means that the amount a publisher earns may vary, depending on the specific ads displayed and the amount paid by the advertisers.

Bitfinder's ad placement process involves three simple steps:

1. You make your website's ad spaces available for ad placement
2. Bitfinder's platform displays the highest-paying ads on your site, based on the content and audience
3. You receive payment for the ads displayed on your site, based on the amount paid by advertisers.

To make your website's ad spaces available, simply paste the ad code provided by Bitfinder onto your site and choose the locations where you want the ads to appear. In a real-time auction,

Step 1

1. You make your website's ad spaces available for ad placement

Step 2

2. Bitfinder's platform displays the highest-paying ads on your site, based on the content and audience

Step 3

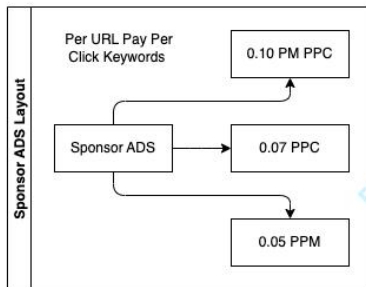

3. You receive payment for the ads displayed on your site, based on the amount paid by advertisers.

Paid to Click Breakdown for Advertisers on Bitfinder Crypto Search Engine

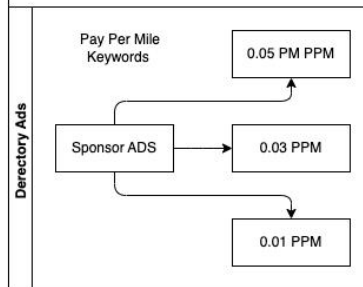

Pay Per Click

Cost per click (CPC) refers to how much an advertiser pays each time a user clicks on a paid ad

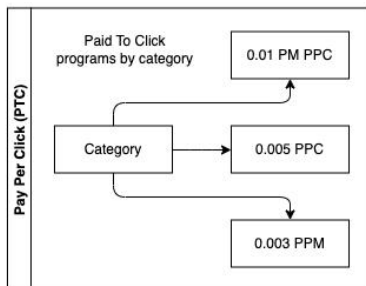

Pay Per Mile

It is the cost an advertiser pays for one thousand views or impressions of an advertisement

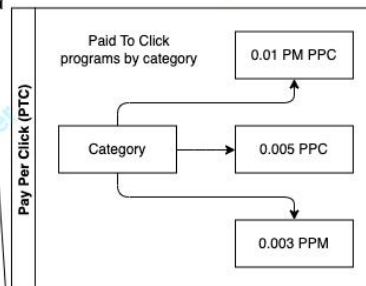

Paid to Click Text Ads

Cost per click (CPC) refers to how much an advertiser pays each time a user clicks on a paid ad

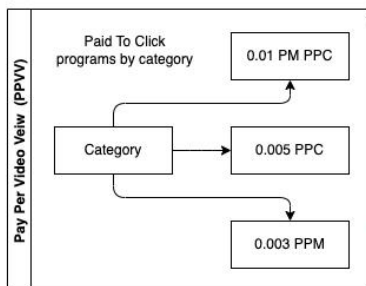

Paid to Click ICO Drops

Cost per click (CPC) refers to how much an advertiser pays each time a user clicks on a paid ad

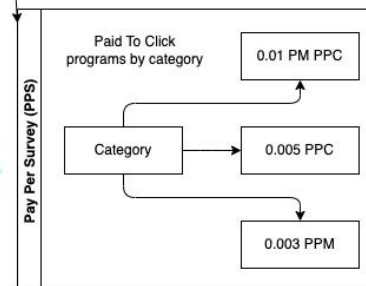

Video Ads

video advertising, reach your target audience with programmatic

Pay Per Survey

Design your own cryptocurrency surveys and decide on the payment per survey.

Crypto Services

More Crypto Advertising Services to follow Soon

We are planning to introduce additional advertising services for the cryptocurrency industry, which will provide businesses with increased exposure and high-quality visibility.

Eco System

Bitfinder Search Engine:

Bitfinder Search Engine is a cutting-edge platform designed to provide users with a comprehensive search engine for cryptocurrency-related information. The platform's search engine is optimized for providing accurate and up-to-date information on cryptocurrency projects, exchanges, news, and other related topics. With Crypto Bitfinder, users can quickly and easily find the information they need to make informed decisions in the cryptocurrency market.

Bitfinder Advertisers:

Crypto Bitfinder Advertisers is a suite of advertising tools and services designed for cryptocurrency-related businesses and projects. The platform offers various types of advertising options, including text ads, sponsor ads, and top-of-search ads, to help advertisers gain maximum visibility for their campaigns. Additionally, Crypto Bitfinder allows advertisers to promote their ICOs, ICO drops, bounties, and exchangers, as well as submit crypto offers, surveys, articles, and crypto news to attract more participants and investors.

Bitfinder Crypto Games:

Crypto Bitfinder Games is a collection of online games developed in house that allow users to earn cryptocurrency while having fun. The platform offers multiple games that enable users to earn cryptocurrency by playing and winning, with more games planned for development over time. Additionally, Crypto Bitfinder provides users with paid-to-watch crypto videos and paid-to-click on ad programs in different sections, not just the search engine.

Bitfinder Earners:

Crypto Bitfinder Earners is a program that rewards users with cryptocurrency for performing various activities on the platform. The program offers a profit-sharing model that pays 25% of the net amount for holding tokens on the system. Additionally, Crypto Bitfinder provides users with paid-to-watch crypto videos and paid-to-click on ad programs in different sections, not just the search engine.

Publishers:

The Bitfinder Crypto Publisher Ecosystem is a thriving network designed to empower publishers, advertisers, and the crypto community as a whole. With Bitfinder, publishers have a platform to showcase their crypto-related content and effectively monetize their efforts.

Within the Bitfinder Crypto Publisher Ecosystem, publishers gain access to a diverse range of crypto-related advertisements that align with their content and audience. These ads can include offerings from various sectors such as cryptocurrency exchanges, blockchain projects, decentralized finance (DeFi) platforms, NFT marketplaces, and more. By integrating these ads into their platforms, publishers can generate revenue and support the growth of their crypto-focused initiatives.

Advertisers benefit from the extensive reach and engagement of the Bitfinder network. They gain access to a targeted audience of crypto enthusiasts, investors, traders, and industry professionals who actively seek relevant information and services. By leveraging the Bitfinder platform, advertisers can effectively promote their crypto offerings and reach their desired audience.

The Bitfinder Crypto Publisher Ecosystem thrives on collaboration, transparency, and mutual success. It provides a seamless and efficient way for publishers and advertisers to connect, enabling the monetization of crypto content while ensuring relevant and engaging advertisements for the community.

Bitfinder Search Engine

Bitfinder Crypto Search Engine is a powerful platform that is constantly evolving to provide users with a fast, secure, and comprehensive search experience for cryptocurrency-related information. The platform's algorithm is designed to interpret and understand user queries, making it easy for users to find the information they need quickly and easily.

Here are some technical details of Bitfinder Crypto Search Engine:

Web 3 Off-Chain and On-Chain Capabilities:

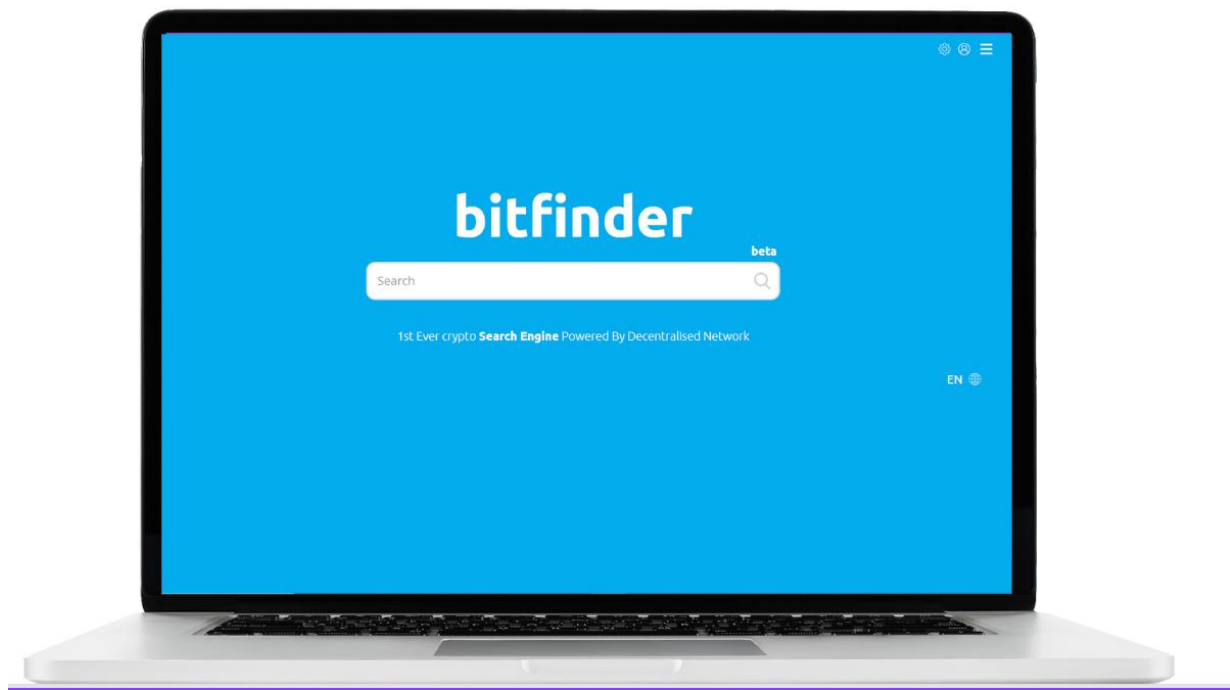

Bitfinder Crypto Search Engine is built on a hybrid architecture that combines off-chain and on-chain technologies. The platform uses off-chain technology to provide fast and secure search results, while on-chain technology is used to store data and enable decentralized applications (dApps) to interact with the platform. This combination allows Bitfinder to offer both speed and security, while also providing users with access to the benefits of decentralized applications.

Advanced Algorithm:

Bitfinder's search algorithm is constantly being improved to provide users with the most accurate and up-to-date information on cryptocurrency projects, exchanges, news, and other related topics. The algorithm is designed to interpret and understand user queries, making it easy for users to find the information they need quickly and easily.

Bitfinder + Browser V.10

Bitfinder's search engine will be optimized for speed, ensuring that users receive their search results within milliseconds. The platform's servers are designed to handle large volumes of traffic, ensuring that users can search and browse the internet without experiencing slow load times or other performance issues.

Bitfinder + Browser Secure Search: ensures that users' search queries and data are encrypted and kept private. The platform uses advanced encryption techniques to protect user data, ensuring that users can search and browse the internet securely and without fear of data theft or hacking.

+ Browser Security and Earning Capabilities

Bitfinder+ browser, which provides users with an anonymous search experience. The browser is designed to protect user privacy by blocking cookies, tracking scripts, and other tracking technologies that can be used to monitor users' online activities. Additionally, the browser includes built-in ad-blocking and anti-phishing tools to protect users from malicious websites and ads.

Earning Crypto Capabilities: Bitfinder+ browser also enables users to earn cryptocurrency while searching the internet. Users can earn cryptocurrency rewards by using the browser and engaging with sponsored content, completing surveys, and watching videos. The rewards can be redeemed for Bitfinder's native token or other popular cryptocurrencies.

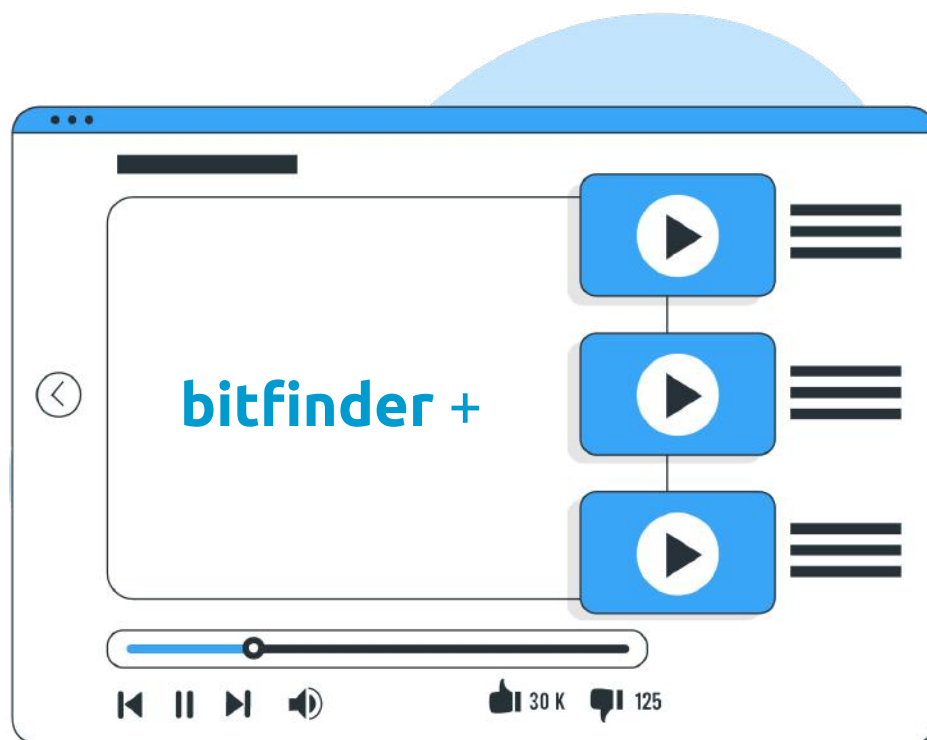

Bitfinder 2025 Projected
**500,000,000 Searches Daily Wolrd
Wide**

User-Friendly Interface:

Bitfinder's interface is designed to be user-friendly and easy to use. The platform's search engine is accessible from the homepage, making it easy for users to find the information they need quickly. Additionally, the platform's search results are displayed in an easy-to-read format, with clear and concise descriptions of each search result.

Overall, Bitfinder Crypto Search Engine and its Bitfinder+ browser provide users with a fast, secure, and private search experience for cryptocurrency-related information. The platform's hybrid architecture, advanced algorithm, and fast search results make it a powerful tool for anyone looking to stay informed in the cryptocurrency market. Additionally, the platform's earning capabilities and anonymous search features make it an attractive option for those looking to earn cryptocurrency while searching the internet.

Road Map

2021 October

The idea for Bitfinder was born, with the vision of revolutionizing how users search and access crypto-related information on the web.

2022 March

Development work begins on the crypto search engine, focusing on creating a secure and decentralized architecture

2022 May

Extensive research and development efforts were undertaken to design the core infrastructure and algorithms required for efficient crypto-focused search capabilities.

2022 Sep

Beta version of the search engine is released to a limited group of testers for feedback.

2023 Feb

The team incorporates testers feedback and makes further improvements to the search engine.

2023 March

The search engine undergoes an external audit to ensure security and compliance with industry standards.

2024 June

Initial coin offering (IEO) Launched on Bitforex to raise funds and expand the bitfinder + Browser capabilities.

2024 July

The search engine is made available to the general public, Extensive research and development efforts undertaken to design the core infrastructure and algorithms required for efficient crypto-focused search capabilities.

Tokenomics 250 Million Tokens

Allocation 250 Million Tokens

	PRE SALE	PRIVATE SALE PHASE 1	PRIVATE SALE PHASE 2	PUBLIC SALE

bitexchanger Planned Project For 2024 August

Bitfinder is proud to announce the development of its very own exchanger platform, Bitexchanger.io. With the aim of providing the best exchange experience for our users, Bitexchanger.io is designed to offer the lowest fees possible, coupled with a high level of security to ensure peace of mind when conducting transactions.

At Bitexchanger.io, users can buy and sell cryptocurrencies easily, with a simplified interface that is accessible even to those who are new to the world of crypto. Our platform supports a wide range of cryptocurrencies, making it easy to find and exchange your preferred coins.

In addition, our team of experts has implemented advanced security features to ensure that your transactions are protected from potential threats, such as fraud and hacking. With Bitexchanger.io, you can rest assured that your assets are in safe hands.

Overall, Bitexchanger.io is set to become one of the most reliable and user-friendly exchanger platforms in the crypto space. With low fees and high security in place, we are confident that our users will be satisfied with the experience..

The Team

Launching a successful project solo can be a daunting task, especially in the world of cryptocurrency. It takes time and effort to build an empire from scratch, and often requires the expertise and assistance of capable individuals to take the project to the next level.

At this stage, as a one-man team, the founder of Bitfinder understands the importance of hunting for the right individuals to bring the project to fruition. While most of the basic codes and systems are in place, the success of the project hinges on the strength of the team and the support of the community.

It is important to acknowledge that the cryptocurrency community can make or break a project, and Bitfinder's founder recognizes the need for community involvement and support. By building a strong and dedicated team and engaging with the community, Bitfinder can reach new heights and establish itself as a reliable and innovative platform within the crypto industry.

In summary, while launching a project solo is possible, it takes a dedicated team and support from the community to achieve success. The founder of Bitfinder is committed to building a strong team and fostering community engagement in order to propel the project forward and achieve its full potential.

Introducing Bitfinder Utility Token:

Bitfinder utility token is an integral part of our ecosystem, designed to provide various benefits and functionalities. As a utility token, it serves as a medium of exchange within the Bitfinder platform, enabling seamless transactions and unlocking exclusive features. Holders of Bitfinder tokens gain access to premium services, discounts, and rewards, enhancing their overall user experience. Additionally, the token can be utilized for staking, participating in governance decisions, and accessing special privileges. Embrace the power of Bitfinder utility token and unlock a world of opportunities within our ecosystem.

By holding Bitfinder utility tokens, users can enjoy a range of advantages. Firstly, the tokens can be used for accessing premium features and services offered by the platform, providing an enhanced and exclusive user experience. These benefits may include priority customer support, advanced data analytics, or early access to new platform features.

Furthermore, Bitfinder utility tokens offer discounts on transaction fees, making it more cost-effective for users to engage in various activities within the platform. Whether it's trading digital assets, participating in token sales, or utilizing other services, users can enjoy reduced fees by utilizing their Bitfinder tokens.

In addition to their utility within the platform, Bitfinder token holders also have the opportunity to participate in the platform's governance. This means that token holders can contribute their insights and vote on important decisions, shaping the future development and direction of the Bitfinder ecosystem.

Terms of Use / Banned Jurisdiction Token Sale

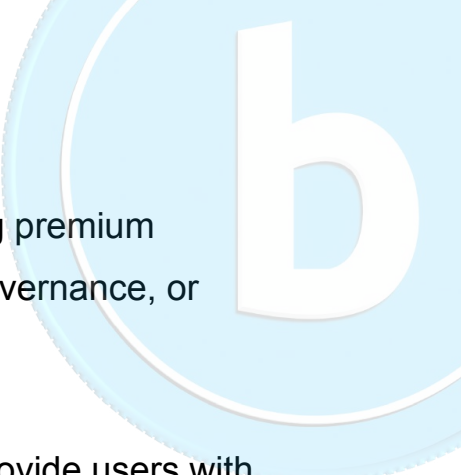

As the Bitfinder platform continues to evolve and grow, updates and new functionalities will be regularly introduced. These advancements may include expanded partnerships, integration with other platforms, or the introduction of innovative tools and features. Token holders will be among the first to receive updates and announcements, ensuring they stay informed and can maximize their engagement with the platform.

Bitfinder utility token serves as the key to unlock a multitude of benefits, empowering users to make the most out of their experience within the Bitfinder ecosystem. As the platform evolves and expands, the utility and value of Bitfinder tokens are expected to grow, offering an exciting opportunity for token holders to participate in the platform's success.

Please note that the information provided is for general knowledge purposes and should not be considered financial or investment advice. It's important to conduct thorough research and consult with a professional advisor before engaging in any token-related activities.

Bitfinder Utility Token Overview:

The Bitfinder utility token is not intended to be classified as a security token. It is designed as a utility token, which means its primary purpose is to provide access to specific services, features, or benefits within the Bitfinder platform. Unlike security tokens, which represent ownership in a company or entity and may be subject to regulatory requirements, Bitfinder utility tokens are not designed as an investment vehicle or a means to generate passive income. Instead, they serve as a means of exchange within the platform and facilitate various activities and interactions.

Holders of Bitfinder utility tokens can utilize them for accessing premium services, enjoying discounted fees, participating in platform governance, or obtaining exclusive rewards.

The tokens are integral to the ecosystem's functionality and provide users with enhanced capabilities and experiences.

It's important to note that the regulatory landscape surrounding cryptocurrencies and utility tokens can vary across jurisdictions. The classification and treatment of tokens may be subject to specific laws and regulations in different regions. Therefore, it's advisable to familiarize yourself with the relevant legal framework and seek professional advice specific to your jurisdiction.

As with any investment or token usage, it's crucial to assess the associated risks, evaluate the token's utility within the platform, and consider factors such as market conditions, project viability, and the team's track record before making any decisions.

Always conduct due diligence, carefully read project documentation, and consult with legal and financial experts to make informed choices regarding token participation or investments.

REPRESENTATIONS AND WARRANTIES OF THE PURCHASER.

The Purchaser hereby represents and warrants the following:

The Purchaser will adhere to all applicable anti-corruption, anti-bribery, anti-money laundering, and payment services regulations, as well as KYC procedures, laws, and regulations governing its activities. The Company will verify compliance prior to entering into the agreement.

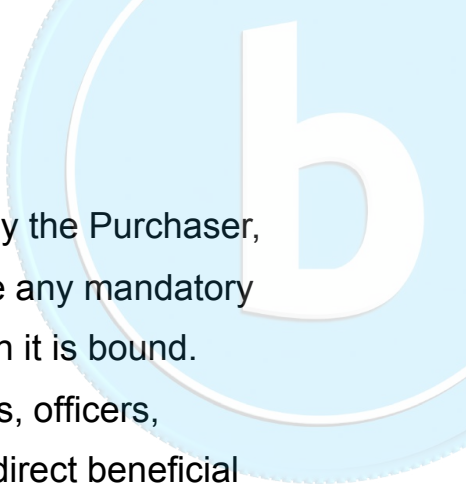

The Purchaser is in good standing and validly incorporated under the laws of its jurisdiction of incorporation.

The Purchaser possesses full rights, power, legal capacity, and authority to enter into and fulfill its obligations under these Terms & Conditions. By entering into this agreement, the Purchaser will not violate or breach any terms, conditions, provisions, or default under any other agreement to which it is a party or its constitutional documents.

The Purchaser has received a copy of the current Whitepaper related to the Tokens, has thoroughly read it, acknowledges that the Whitepaper may undergo changes before the delivery of the Tokens, and agrees to promptly review new versions of the Whitepaper, which will be available through the Company's website.

The Purchaser understands that the Tokens solely grant the right to utilize them and do not confer any other rights related to the Tokens or the Company. This includes, but is not limited to, voting rights, distribution rights, redemption rights, liquidation rights, proprietary rights (including intellectual property rights), rights to receive accounts, financial statements, or other financial data, rights to requisition or participate in shareholder meetings, rights to nominate directors, or any other financial or legal rights in the Company.

These Terms & Conditions constitute legally valid and binding obligations of the Company under its governing law. They are enforceable against the Company in accordance with their terms.

(vii) The execution and delivery of these Terms & Conditions by the Purchaser, as well as the fulfillment of its obligations herein, do not violate any mandatory requirements of applicable legislation or any contracts to which it is bound.

(viii) Neither the Purchaser nor any of its subsidiaries, directors, officers, employees, agents, affiliates, or any person with a direct or indirect beneficial interest in the Purchaser or the Tokens being acquired by the Purchaser, or any person acting as an agent or nominee for the Purchaser in relation to the Tokens, is subject to any sanctions administered or enforced by any country, government, or international authority. This includes, but is not limited to, the British Virgin Islands Financial Services Commission, the US Department of the Treasury's Office of Foreign Assets Control (OFAC), the US Department of State, the United Nations Security Council, the European Union, Her Majesty's Treasury, the Hong Kong Monetary Authority, or the Monetary Authority of Singapore (collectively referred to as "Sanctions").

(ix) The Purchaser is neither located, organized, a citizen, nor a resident in a country or territory that is subject to Sanctions, nor is its government subject to Sanctions.

(x) The Purchaser is not listed in any sanctioned persons list, including those maintained under Sanctions such as the Table of Denial Orders, the Entity List, Specially Designated Nationals and Blocked Persons list, or the Foreign Sanctions Evaders List maintained by OFAC.

(xi) The Purchaser is not a citizen, resident, or legal entity of the United States of America, the People's Republic of China, Afghanistan, Belarus, British Virgin Islands, Central African Republic, Congo, Democratic Republic of the Congo, Republic of Cote D'Ivoire, Crimea region of Ukraine, Cuba, El Salvador, Eswatini, Gambia, Iran, Iraq, Liberia, Libya, Malawi, Mali, Moldova, Myanmar, Niger, North Korea, Palestinian Territory, South Sudan, Sudan, Syria, Venezuela, Yemen, Zambia, Zimbabwe,

any state, country, or other jurisdiction that is sanctioned and/or embargoed by the United States of America, the European Union, and/or Switzerland, a jurisdiction where it would be illegal according to local law or regulation for you to purchase Tokens, or where the sale of Tokens is prohibited or contrary to local law or regulation, or could subject BitFinder to any local registration, regulatory, or licensing requirements.

Thank you for taking the time to read our white paper. We appreciate your interest and support. At Bitfinder, we are committed to continuous innovation and creating new services.

We value the input and participation of our community, as it is the driving force behind our progress. We recognize that without the support of our community, we would not be able to achieve our goals.

As we move forward and complete all ICO stages, we will remain dedicated to delivering on our promises and working tirelessly to provide exceptional solutions in the cryptocurrency industry. Together, we can shape a brighter future for decentralized finance.

Thank you for taking the time to read our white paper. We appreciate your interest and support. At Bitfinder, we are committed to continuous innovation and creating new services.

We value the input and participation of our community, as it is the driving force behind our progress. We recognize that without the support of our community, we would not be able to achieve our goals.

THE FOUNDER

I am determined to make the crypto industry more exhilarating by connecting it with real-world services across the globe. My goal is to bridge the gap between cryptocurrencies and everyday transactions, making digital currencies a seamless and accessible part of people's lives. Through innovation and collaboration, I will work tirelessly to bring exciting new possibilities to the crypto landscape, empowering individuals and businesses to embrace the benefits of this transformative technology. Together, we can unlock a world where crypto becomes an integral part of our daily experiences, revolutionizing the way we transact and engage with the global economy.
